

All-Cause Mortality by Vaccination Status by Craig Paardekooper

Reference : [Deaths by vaccination status, England - Office for National Statistics](#)

APRIL 2021

Vaccination status	Count of deaths	Person-years	Age-standardised mortality rate / 100,000 person-years
Unvaccinated	3,556	1,627,374	2087.2
First dose, less than 21 days ago	428	225,906	1851.2
First dose, at least 21 days ago	16,237	1,271,496	1594.8
Second dose, less than 21 days ago	5,431	402,753	470.9
Second dose, between 21 days and 6 months ago	5,884	218,219	709.1

MAY 2021

Unvaccinated	2,871	1,440,421	1720.2
First dose, less than 21 days ago	155	186,246	1614.5
First dose, at least 21 days ago	8,123	844,993	5002.5
Second dose, less than 21 days ago	3,373	525,787	777.1
Second dose, between 21 days and 6 months ago	19,529	875,765	766.2

JUNE 2021

Unvaccinated	2,385	1,081,514	1537.8
First dose, less than 21 days ago	93	219,920	1809.9
First dose, at least 21 days ago	3,697	461,837	6358.5
Second dose, less than 21 days ago	976	406,838	1462.1
Second dose, between 21 days and 6 months ago	25,687	1,580,685	791.7

JULY 2021

Unvaccinated	2,553	898,740	1681.5
First dose, less than 21 days ago	70	127,971	1101.5
First dose, at least 21 days ago	2,331	463,938	6036.0
Second dose, less than 21 days ago	325	214,015	1885.4
Second dose, between 21 days and 6 months ago	30,819	2,145,514	1348.2
Second dose, at least 6 months ago	1,208	28,063	578.1

AUGUST 2021

Unvaccinated	2,557	834,628	1758.7
First dose, less than 21 days ago	39	43,541	1875.3
First dose, at least 21 days ago	1,522	315,220	4780.4
Second dose, less than 21 days ago	131	202,848	1467.3
Second dose, between 21 days and 6 months ago	31,314	2,442,539	919.7
Second dose, at least 6 months ago	1,733	41,936	680.4

SEPTEMBER 2021

Unvaccinated	2,394	753,541	1722.5
First dose, less than 21 days ago	18	36,815	741.9
First dose, at least 21 days ago	1,235	174,341	4636.0
Second dose, less than 21 days ago	53	116,941	977.8
Second dose, between 21 days and 6 months ago	29,265	2,542,509	985.2
Second dose, at least 6 months ago	5,170	122,229	1067.6
Third dose or booster, less than 21 days ago	87	11,415	220.2

OCTOBER 2021

Unvaccinated	2,379	726,117	1705.5
First dose, less than 21 days ago	20	43,120	1907.5
First dose, at least 21 days ago	1,154	164,401	4727.9
Second dose, less than 21 days ago	54	38,582	1944.6
Second dose, between 21 days and 6 months ago	14,530	2,235,223	1248.1
Second dose, at least 6 months ago	18,767	361,802	1759.7
Third dose or booster, less than 21 days ago	3,766	256,858	396.4
Third dose or booster, at least 21 days ago	1,145	59,043	482.2

NOVEMBER 2021

Unvaccinated	2,473	639,411	1862.9
First dose, less than 21 days ago	33	45,076	3740.5
First dose, at least 21 days ago	855	187,375	3857.8
Second dose, less than 21 days ago	52	23,868	2185.5
Second dose, between 21 days and 6 months ago	3,746	1,477,694	1870.4
Second dose, at least 6 months ago	18,885	488,331	2835.2
Third dose or booster, less than 21 days ago	4,676	433,365	587.1
Third dose or booster, at least 21 days ago	11,186	466,157	705.4

DECEMBER 2021

Unvaccinated	2,787	623,517	2087.7
First dose, less than 21 days ago	19	26,486	1473.4
First dose, at least 21 days ago	855	207,004	4198.1
Second dose, less than 21 days ago	44	36,134	1620.9
Second dose, between 21 days and 6 months ago	1,312	778,510	2483.2
Second dose, at least 6 months ago	12,644	397,161	4804.8
Third dose or booster, less than 21 days ago	3,512	659,719	1037.8
Third dose or booster, at least 21 days ago	24,568	1,159,587	856.4

Initially, in April 2021, the vaccinated appear to have a 10% lower all-cause mortality. However, one month later, those who had a first dose had a 290% greater all cause mortality.

This only got worse in succeeding months for those who had taken a first dose –

- June 413% greater all-cause mortality compared to unvaccinated
- July 359% greater all-cause mortality compared to unvaccinated
- August 271% greater all-cause mortality compared to unvaccinated
- September 269% greater all-cause mortality compared to unvaccinated
- October 277% greater all-cause mortality compared to unvaccinated
- November 207% greater all-cause mortality compared to unvaccinated
- December 201% greater all-cause mortality compared to unvaccinated

So why were those vaccinated with a single jab dying at more than twice the rate compared to unvaccinated persons? Note that these were not COVID deaths, but ALL-CAUSE deaths – so this cannot be attributed to “variants”.

This data suggests that the vaccines seriously damaged their health – resulting in a doubling in mortality !

We can observe that this effect diminishes over time. At its peak in June, those who had taken a single shot had 4 x the all-cause mortality compared to unvaccinated persons, but by December this had fallen to 2 x the all-cause mortality.

Remarkably, this is the governments own data !

Its as clear as day, and as dark as night.
