

How We Knew – evidence suggestive of harmful intent in 2020

Many of those who have been injured by the vaccine or who know someone injured, are asking a question – how did the unvaccinated know to be cautious?

The number of the unvaccinated is about 20% of the UK population. With each jab, more people dropped out –

- First Jab 80%
- Second Jab 70%
- Third Jab 50%
- Fourth jab 30%
- Fifth jab 10%

So what did the 20% know, that the others only realized later?

Here is an outline of the evidence in 2020 which made the unvaccinated just say NO. These are the things that happened, that made me realize governments had been taken over by an ideology that was very harmful to their own populations. The persistent mal-intent was so obvious, it terrified me.

I have not covered pre-2020 or post 2020.. **I have not** included (yet) the evidence that the Vaccine was prepared and planned in advance – as evidenced by prior depopulation programs (WHO in Kenya), training events, supply purchases, vaccine patents, evidence that COVID is a synthetic virus with evidence of insertions.. **I have also not** included (yet) the evidence in 2021 of harmful intent – such as the perpetuation of vaccine rollout despite thousands of deaths. The censorship of testimonies about these adverse reactions, banning of doctors from offering alternative treatments, the wholesale altering of the DMED database to hide all the military injuries, the passing of bills allowing the incarceration of people suspected of infection. The « No Jab No Job » policies **etc. etc. etc. etc.**

I have only listed below the things that happened in 2020.

1. Suppression of effective medicines to treat COVID

- a. Vitamin D
- b. HCQ
- c. Ivermectin
- d. Exercise
- e. **Murdering subjects** by overdosing them on alternatives
- f. **Banning doctors** from prescribing alternatives.
- g. Censoring information about alternatives

2. Hying the number of deaths from COVID to create fear

- a. Fake PCR
 - i. High cycles
 - ii. Testing for sequences found in human genome
- b. Doctored videos of same people from other incidents
- c. Altering death certificates to COVID
- d. **14 day rule** – all deaths within 14 days of a positive PCR
- e. Empty hospitals
- f. Unused nightingale hospitals
- g. No excess mortality in 2020
- h. Flu re-labelled as Covid : Flu disappears

3. Use of harmful protocols to treat the aged

- a. Hospitals refusing treatment
- b. Use of midazolam in care homes
- c. **Do Not Resuscitate orders**
- d. Mass deaths in care homes following these protocols.

4. Treating healthy people as if they are dangerous carriers

- a. Preventing local travel
- b. Imposing one-way movement for pedestrians
- c. Imposing a 2m rule to separate everyone
- d. Preventing visiting friends and family
- e. Closing gyms
- f. Closing all restaurants
- g. Closing schools and universities
- h. Stopping face-to-face communication
- i. Stopping all gatherings
- j. Closing all the churches
- k. Mandating of PPE for use of public transport and entry to a public venue
- l. **Threatening that lockdowns would continue until the vaccine arrived**, despite the fact that the vaccine was a complete unknown.
- m. Removal of rights to work and earn, move freely, breath freely, meet freely, communicate freely
- n. Tracking and Tracing : having to fill in a form stating your name, phone and email, just to buy a cup of coffee. With the threat that if any infected person entered the same café while I was there, then I would be required to isolate without income for 2 weeks.

5. Information Control

- a. Media in lockstep with a single narrative – no other narrative allowed
- b. Constant, repetitive broadcasts to induce fear

6. Boiling the frog slowly

- a. Started with just a few days to flatten the curve then constantly extending

7. Simultaneous lockdown occurring across the globe - synchronized

8. Removal of all liability of pharma for any injuries caused (October 2020)

9. The passing of **COVID 2020 legislation** that allowed for the removal of any individual to a testing facility where they could be kept

10. **Building of Quarantine camps**, where a person can be kept indefinitely, in isolation and force medicated

The most egregious government policies were those that treated perfectly healthy people as disease carriers – resulting in the complete negation of their human rights. They weren't allowed to work, go to school, see relatives, meet others, breath properly, even go outside. It soon became obvious that the governments were not insane - their intentions were deliberate, carefully planned and very harmful towards the people.

I remember that last summer in 2020, watching people relaxing in the grassy fields of the common, playing with their friends and families. I felt it would be their last holiday, their last happy summer.

Throughout the summer of 2020 I began buying equipment for survival – camping gear, food supplies, scouting out refuges in woods. The government had banned all foreign travel, making escape impossible. Everyday it felt like a noose was closing tighter and tighter around the people – like the door of a trap was being closed.

This is how we knew.

I had voted for the government. I now had a thousand reasons to fear and distrust them. They had

- denied effective medicines,
- murdered experimental subjects,
- used lies and subterfuge to boost covid numbers,
- euthanized the aged,
- falsely labelled the healthy as carriers,
- destroyed millions of small businesses,
- removed liability – our only safeguard against malpractice,
- passed laws that allowed the detention and imprisonment of any person suspected of being a carrier.

This is how we knew....that their intention was harmful.
