

# Placebo Batch Numbers

By Craig Paardekoooper

The Danish study [[Danish Study](#)] found that one third of the batches were placebos. What's more the German regulators only tested the medium and high toxicity batches [See this article - [German Testing](#)]- they never tested the placebos - presumably because they knew they were just saline.

## The Batch Numbers

When we look at the placebo batch numbers that make up the Danish placebo group we find an interesting phenomenon. Look at the table where the high toxicity lots are in blue, the medium toxicity lots are in green and the placebo lots are in yellow .

Welche Chargen aus der dänischen Studie hat das Paul-Ehrlich-Institut kontrolliert und freigegeben?				
Batch	Doses	ADR(all)	Group	PEI
EJ6796	11700	2160	Blue	ja
EJ6797	43290	7092	Blue	ja
EM0477	57330	7713	Blue	ja

FM9088	157950	0	Yellow	nein
FN5519	193050	0	Yellow	nein

"Blaue Chargen": zeitnahe Schadensmeldung bei jeder 6. bis 10. Impfung.

Weniger als 5% der Verimpfungen, dennoch im zeitlichen Zusammenhang von fast 50% der gemeldeten 579 Todesfälle.

Bei den ungefählichen "Gelben Chargen" wurde eine Kontrolle durch das PEI in der Regel nicht als notwendig erachtet.

Notice that –

- The high toxicity batches have lot numbers in the alpha numeric range - EJ EK EL EM
- The medium toxicity lots have lot numbers - EP ER ET EW EX EY FA FC FD FE FF and FG
- The placebos (ultra low toxicity) have lot numbers FG FH FJ FK FL FM

You probably notice that the three different toxicity levels are all alphanumeric series in ascending order.

This is a dramatic confirmation of earlier work –

- [alphabetic\\_toxicity2.pdf \(howbad.info\)](#)
- [toxicitytesting.pdf \(howbad.info\)](#)

## Tested or Un-Tested

"ja" means tested; "Nein" means not tested.

Note that all the blue lots were tested. All the green lots were tested EXCEPT three which happen to be FD, FF, and FG - (all at the highest alphanumeric end for that green group). And note that in the yellow group none were tested EXCEPT one, FG, which happens to be at the lowest alphanumeric position for this yellow group).
